ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: PERIMETER WALL SECURITY SYSTEMS

(57) Abstract: A security system comprising an attachment (1) for mounting on a wall top, having a first part (4) that is fixable to the wall and a second part (6) that is mounted for relative movement on said first part upon the application of a force thereto whereby movement of the second part generates a signal to activate a visual and/or audible alarm, the second part having at least one pair of opposing members (40a, 40b) for partially overlapping a side of the first part so as to retain the second part, the second part being sized so as to allow a limited range of movement with respect to said first part without its release therefrom.
